

Colorado / Wyoming Chapter of the American Statistical Association and the University of Colorado Denver Department of Mathematical Sciences present

# A Survey of Statistical Work for Human Rights

## David Banks - Duke University

Thursday March 20st - Noon - 1pm. - Auraria Campus Media Center.  
(Via video conference, two-way communication between Denver audience and speaker will be available.)

- Statisticians have been involved in different areas of human rights research, from the trial of Slobodan Milosovic to designing surveys of displaced populations to analysis of political science data. This talk describes some of these applications and issues that arose in performing them.
- David Banks is a Professor of the Practice of Statistics at Duke University. David is also a co-editor of the recently published Statistical Methods for Human Rights, published by Springer, New York.
- The Auraria Media Center is located on the lower level of the Auraria Library. The entrance is located on the east side. (see [www.ahec.edu/campusmaps/maps.htm](http://www.ahec.edu/campusmaps/maps.htm)). For more information contact Matt Pocernich [mjpdenver@gmail.com](mailto:mjpdenver@gmail.com).

Light refreshments will be served – but feel free to bring your lunch.
