

**Tenure-track Faculty Position in Solid Earth / Planetary Geology
Rutgers University, New Brunswick**

The Department of Earth and Planetary Sciences, Rutgers University, New Brunswick, is accepting applications for a tenure-track position at the assistant professor level in the area of Solid Earth / Planetary Geology. The specific research specialty is open; however, preference is toward sample-based inquiry complementing the department's strengths in the study of large igneous provinces, rift and arc-magmatism, and meteoritics. Supportive analytical facilities include MC-ICPMS, LA-ICPMS, TIMS, Noble Gas and Stable Isotope mass spectrometry, EPMA, XRF, and Rock Magnetism laboratories. The successful candidate will be expected to pursue an externally funded research program and be committed to teaching Solid Earth / Planetary Geology courses at the undergraduate and graduate levels. Interested applicants must have a Ph.D. in hand by the anticipated start date of September 1, 2014.

Applicants should submit a current curriculum vitae, a research and teaching statement, and names and contact information of three individuals who are capable of assessing the applicant's research and instructional programs. Applications must be submitted electronically at apply.interfolio.com/23358. Review of applications will begin November 1, 2013 and continue until the position is filled. Questions concerning the position should be addressed to the department Chair, Professor Carl Swisher, at cswish@eps.rutgers.edu.

Rutgers University is an equal opportunity/affirmative action employer committed to diversity. Women, minorities, and members of under-represented groups are encouraged to apply.
