

Graduate Fellowship Opportunities at the University at Albany's Atmospheric Sciences Research Center

The University at Albany's Atmospheric Sciences Research Center (ASRC), Albany, NY, USA, is pleased to announce merit-based graduate fellowship opportunities for incoming doctoral students, beginning Fall 2015. ASRC is a world-class research center focused on all aspects of the atmospheric sciences. Its active research faculty are affiliated with the Departments of Atmospheric and Environmental Sciences, Physics, and the School of Public Health. The Center is specifically recruiting applicants in the areas of: ice microphysics; wind energy; aerosol-cloud radiation interactions; hurricanes and tropical meteorology; air pollution and atmospheric chemistry; and regional and global climate modeling. However, outstanding candidates from all areas of Atmospheric Science are encouraged to apply. Applicants must submit: (1) an application for admission to the appropriate University of Albany graduate program (<http://www.albany.edu/graduate/graduate-admissions.php>) and (2) a letter requesting fellowship consideration to the ASRC Graduate Fellowship Committee, c/o Dr. Kara Sulia (ksulia@albany.edu). Fellowships carry a full tuition waiver and a stipend of \$25,500/yr. In most cases, pending satisfactory academic performance, applicants can expect comparable support levels in subsequent years. The deadline for applications is February 15, 2015. Applicants are strongly encouraged to coordinate their application with a faculty member at ASRC. For more information on faculty, research areas and affiliations, and the application process, please visit (<http://asrc.albany.edu/opportunities/studjobs.html>).
