Science Alliance Leadership Training (SALT)

→ www.nyas.org/SALT2017

Science Alliance Leadership Training (SALT) is the only program in the United States that provides hands-on leadership training for PhD students in STEM fields. This 5-day program will provide participants with tools such as interpersonal skills, conflict management, and assertive communication techniques, preparing them to assume leadership roles throughout their careers.

Program Overview

Overall Program Goals

- Build essential leadership skills in early career scientists that will assist the participants to lead academic transformation.
- Establish and develop a strong and diverse network of STEM leaders with top credentials.
- Develop a framework with specific goals and actions to achieve professional success.

Eligibility

- Applicants must be actively engaged in STEM research as PhD students.
- Applicants must have completed their second year of their PhD program by May 2017.
- Applicants must be Members of the Academy at the time of application.

Location

The New York Academy of Sciences
7 World Trade Center
250 Greenwich Street
40th Floor
New York, NY 10007
