

## Permanent Academic Position

05/August/2017

The Geoscience Institute of the University of Brasília, in Brasilia, Brazil, has an open full academic position to teach and develop research on **Geochemistry**.

The Geoscience Institute is a high ranking academic geological center in Brazil. Located in Brasilia downtown, the institute has three undergraduate programs (Geology, Geophysics and Environmental Science) and two graduate programs (Geology and Applied Geosciences). It also has excellent laboratory facilities to develop advanced scientific studies, such mass spectrometers for geochronology, isotope geochemistry and stable isotopes; electronic microprobe and scanning electron microscope for mineralogy and petrology studies; a variety of equipments dedicated to geophysical survey; a seismic observatory, a geochemical lab, among others.

The position is open for geologists with doctorate/PhD in **Geochemistry** to engage in a full academic position after public exams. For further information send a message to [unbgeosciences@gmail.com](mailto:unbgeosciences@gmail.com).
