Geoscience Manager – Digital Mapping Laboratory **Idaho Geological Survey**

Position Description

The Idaho Geological Survey (IGS) has a full-time, permanent opening for a Geoscience Manager to oversee and manage the Digital Mapping Laboratory located on the Moscow campus of the University of Idaho. The Geoscience Manager will manage and maintain production, publication, and delivery of geologic and other IGS maps, products, and data. The successful candidate will supervise and train Geologists, GIS Analysts, Digital Cartographers, and others working on Survey projects within the Digital Mapping Laboratory. The incumbent will also be responsible for the oversight of Information Technology contractors, maintaining and updating GIS software, developing and maintaining lab budgets for equipment and service contracts, identifying equipment and software needs, and providing input to the Director for long-term planning and best management practices to ensure smooth operation of the Lab. Co-management of the IGS website and Windows network domain are additional responsibilities of the position. A strong understanding of geologic mapping principals are important skills for the incumbent to successfully collaborate with geologic staff on research projects.

An attractive benefits package and moving allowance is available to the successful candidate; an annual salary up to \$70,000 is provided, commensurate with experience.
