## Assistant Professor of Environmental Science

**Position:** The Department of Earth, Environmental, and Geographical Sciences (EEGS) at Northern Michigan University (NMU) invites applications for a tenure-earning Assistant Professor of Environmental Science to begin in August 2020. We seek an applied environmental scientist with teaching and research experience that integrates natural science disciplines and incorporates quantitative analysis to address global environmental challenges. We welcome applicants with professional experiences suited to teaching interdisciplinary courses who will contribute to existing strengths in environmental science teaching and research in EEGS.

**Duties and Responsibilities:** The successful candidate will teach courses that complement the Department's curriculum, publish environmental science focused research, and complete departmental, university and professional service. This is a campus-based position.

**Minimum Qualifications:** Required minimum qualifications include a Ph.D. granted by August 15, 2020, an active scholarly agenda, and a publication record in Environmental Science, Geography, or a closely related field. Demonstrated university teaching experience and a strong commitment to provide excellent undergraduate instruction and advising.

**Knowledge, Skills and Abilities Required:** Demonstrated ability to teach courses such as Introduction to Environmental Science, Introduction to Geographic Research, Quantitative Methods, Environmental Impact Assessment, and an intermediate-level environmental science course related to the candidate's area of expertise that complements our Department's curriculum. Ability to produce applied environmental science scholarship, and an active research agenda in applied environmental science disciplines such as natural resource management, agricultural science, environmental hazards, or environmental remediation.

**Additional Desirable Qualifications:** Demonstrated commitment and ability to provide excellent undergraduate instruction and advising. Ability to secure interdisciplinary grants, and experience with applied environmental science research. Desire to work collaboratively to examine human-environment interactions and to address contemporary sustainability challenges. Experience integrating geographic information systems or remote sensing into environmental science research. For a complete listing of the requirements, knowledge, skills, and abilities for this position, please visit <https://employe.nmu.edu>.

The review of applicants will begin November 1, 2019. Applications received after that date will not be considered. All applicants must include a cover letter, teaching statement, research statement, a curriculum vitae, unofficial transcripts, and contact information (names, addresses, email addresses, and telephone numbers) for three references. To apply for this position please visit <https://employe.nmu.edu>.

Northern Michigan University, with 7,900 students and 177 degree programs, is located along the shore of Lake Superior in the vibrant, historic city of Marquette, consistently named a top spot in the nation to raise a family, vacation, and enjoy an excellent quality of life.
