Postdoctoral Fellows are expected to have strong computational skills, excitement to work on a new research subject, a good publication record, a high level of independence, curiosity and creativity, and an interest in working in an international and interdisciplinary research environment. The successful candidate will work with Prof. Axel Timmermann and Dr. Jung-Eun Chu to conduct and analyze high-resolution CESM simulations to address how past and future hothouse conditions impact tropical cyclones, their landfall characteristics, pathways and their effect on ocean circulation and mixing.

The IBS Center for Climate Physics (ICCP), (<http://iccp.ibs.re.kr>) directed by Dr. Axel Timmermann, is dedicated to advancing the understanding of natural climate variability, man-made climate change and their impacts on the hydrological cycle, regional processes, ice-sheets, and sea level. The ICCP is generously funded through the Institute for Basic Science (IBS) (<http://ibs.re.kr>). ICCP is located in Busan, the second largest city in South Korea and the ninth largest port city in the world. Surrounded by ocean and mountains, the city has a dramatic natural background. From designer cafes, international movie and art festivals, award-winning restaurants to temples at the end of hiking trails, Busan has something to offer for everyone.
