

# 2019 | NCAR EXPLORER SERIES

## Peering into the Storms with Weather Radars – Past, Present and Future

Find out what's going on inside high-impact and severe storms! Weather radars probe inside the most violent storms on earth and have been placed on the ground, mounted on trucks and ships, flown on aircraft and sent into space on satellites. In this talk, NCAR scientist Wen-Chau Lee will discuss the history and advancement of weather radars, how internal structures of storms are revealed, and what the future might hold for weather radars as a tool for scientific research and weather observations.

Dr. Wen-Chau Lee
