

Atmospheric Science Position

The Department of Earth and Space Science and Engineering, Lassonde School of Engineering, York University, invites applications for a contractually limited appointment at the rank of Assistant Professor in the field of Atmospheric Science, to commence July 1, 2014.

We are seeking applicants who can contribute to the teaching program in atmospheric science and also conduct research involving experiment or theory/modeling. The teaching will be within the atmospheric science degree program and also for the meteorology certificate program. Subjects include atmospheric dynamics, radiation, cloud physics, weather prediction, and climate. Research areas that would complement current activity in the department are planetary atmospheres, climate feedback processes, atmosphere-surface interaction, air quality, and atmospheric dynamics. The successful candidate will have a PhD in Atmospheric Science or a related field and must have a strong commitment to research and teaching.

Individuals interested in applying for the position should complete an online application at <http://lassonde.yorku.ca/new-faculty/>. A complete on-line application shall include a cover letter, a detailed CV, statements of teaching and research contributions, and at least three reference letters. Complete applications must be received by March 7, 2014. Informal enquiries about the Department of Earth and Space Science and Engineering may be made to Professor Regina Lee, Ph.D, P.Eng. (reginal@yorku.ca), Chair, Department of Earth and Space Science and Engineering.
