

AGU 2020

**coffee with
COFFIES**

Calling all undergraduates, graduate students, and postdocs attending AGU in 2020! You are cordially invited to join COFFIES researchers, educators, and other leaders for an informal, wide-ranging discussion on current and future solar physics research topics, as well as the many possible education and career paths in this field.

As one of nine NASA-funded Heliophysics Phase I DRIVE Science Centers (DSCs), COFFIES (Consequences of Fields and Flows in the Interior and Exterior of the Sun) is working to establish a multi-institution DSC to develop the most reliable data driven physical model of solar activity possible.

To stay up-to-date on this session, including the exact date and time, and for more information, please fill out the interest form at bit.ly/coffies or use the QR code and we'll be in touch!
