

Summer Undergraduate Arctic Research Opportunity

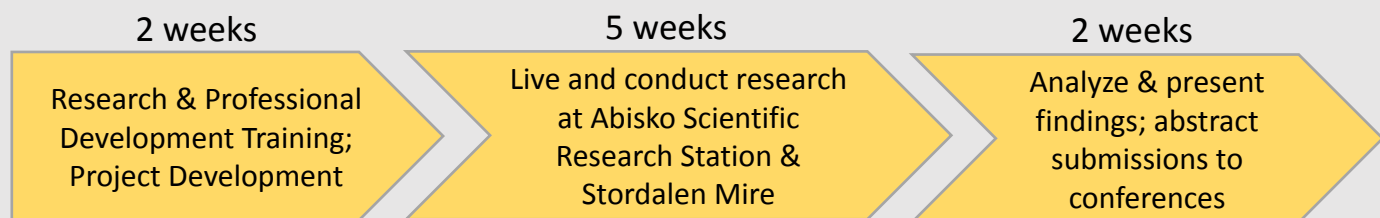

Join the collaborative **EMERGE Institute** as we investigate the connection between **Emergent Ecosystem Responses to Change** with a Genes-to-Ecosystems approach

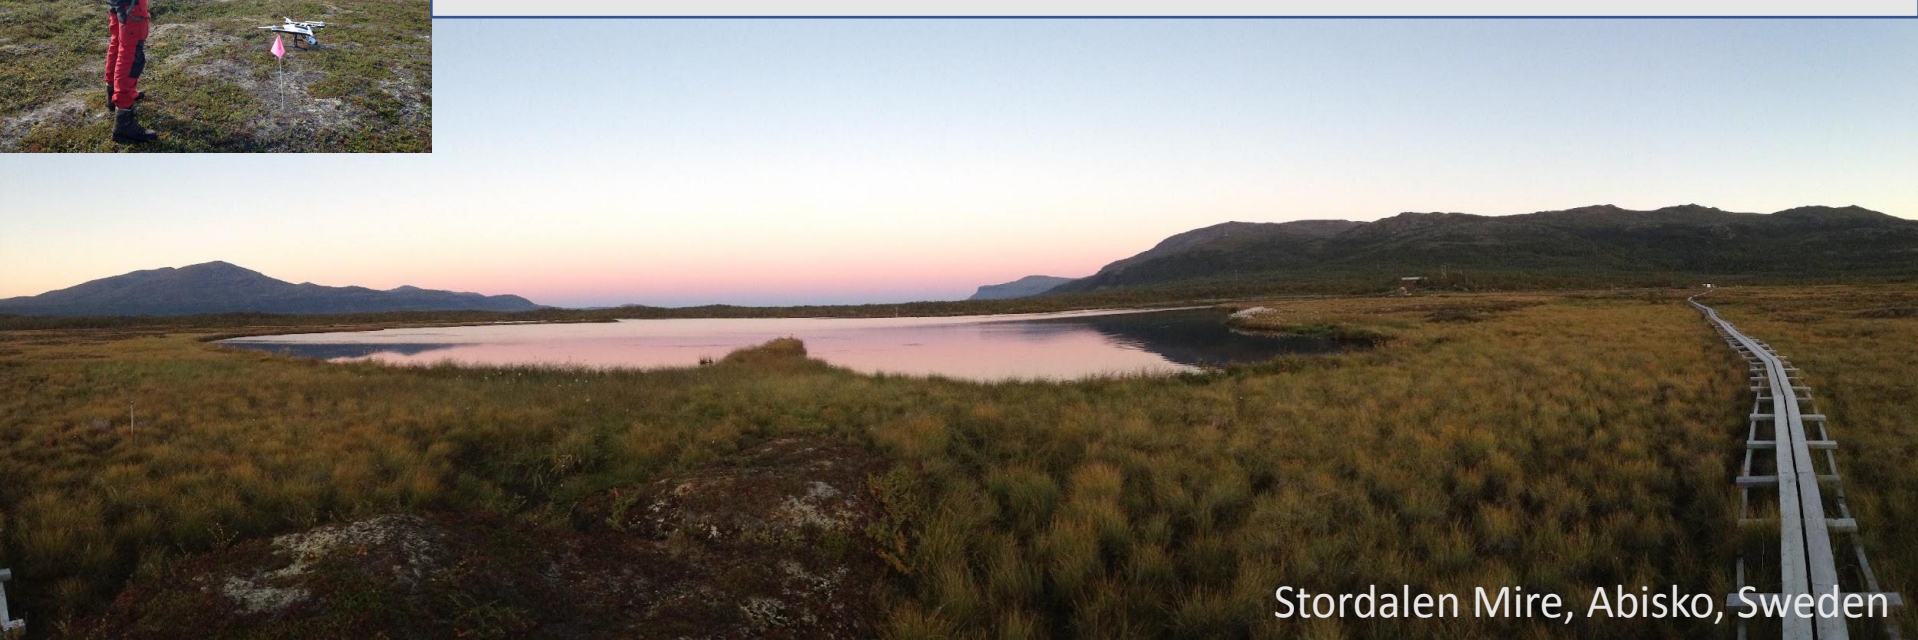

June 6th – August 5th 2022

The **EMERGE Institute** is seeking enthusiastic and motivated undergraduate or post baccalaureate students who wish to **participate in team-driven, co-mentored, integrative biology research projects** that look to understand complex biological questions that span scales from microbes, to plants, to remote sensing. **Work with EMERGE faculty, postdoctoral researchers and graduate students to develop projects, travel to Northern Sweden to conduct field work, all while earning a summer stipend, gain skills in networking, mentoring, professional development and present your research at professional conferences.**

Review of Applications will begin December 20th, 2021
