Convergent Arctic Research Perspectives and Education (CARPE) Graduate Research Traineeship

Educational and Training Opportunities:

- *Convergence team science*
- *Decolonizing science*
- *Engaging Arctic communities, and many more*

Field Trips:

- *Alaska*
- *Appledore Island*
- *Mt. Washington, and others*

ENHANCE YOUR GRADUATE EDUCATION by using convergence research and decolonizing scientific approaches to tackle the complex social-ecological challenges of changing seasonality in the Arctic.

CARPE is an NSF-sponsored graduate research traineeship that will prepare you to pursue academic or non-academic careers that address grand challenges posed by a changing climate and the cascading impacts on society.

Applications are now being accepted for Fall 2022!

***JOIN OUR TEAM** as we design and conduct research while learning how to co-produce knowledge with Arctic Indigenous communities and local stakeholders*

This program is funded by the National Science Foundation (NSF #2125868)

**University of
New Hampshire**

Morse Hall, 8 College Road, Durham, NH 03824
