# Join the Blue Water Exchange

The Blue Water Exchange is an 8-month opportunity for individuals to work in new landscapes, learn from different cultures, gain exposure to career paths, and expand their perspectives through deep dialogue about our communities' most pressing issues.

## Virtual Learning

Meet virtually each month to hear from guest speakers on topics including connection to place and past, indigenous perspectives, current environmental issues, research, community engagement, and more.

## Expenses Paid Travel

Travel to California and Hawai'i for four weeks for hands-on, place-based experiences. The program will cover the cost for your airfare, ground transportation, lodging, and meals while traveling.

## Mentorship & Connection

Connect and share with fellow conservationists through personal development workshops and discussions guided by program mentors.
