

POST DOCTORAL FELLOWSHIP OPPORTUNITY IN ATMOSPHERIC SCIENCE

The University of Hawaii Department of Atmospheric Sciences located in Honolulu, Hawai'i has an opening for a research associate. The position is part of an initiative to improve the use of satellite data in numerical weather prediction that is funded by the Office of Naval Research. The position is funded at \$75,000 annually for three years, plus benefits. Salary may be flexible for applicants with exceptional experience. There may be opportunity for extension thereafter.

Applicants must have a Ph.D. in an environmental science, applied math or computer science. Candidates who have experience and interest in scientific programming, AI, data assimilation, or numerical weather prediction are especially encouraged to apply. Given the source of funding, applicants with US citizenship will be given preference, but it is not a requirement.

To apply, email a cover letter, CV, copy of degree/transcripts, and the names and contact information for three supervisory references (telephone and e-mail addresses) to: Professor Steven Businger, businger@hawaii.edu. The position is open until filled.

For more information about the Department of Atmospheric Sciences and the research carried out at the School of Ocean and Earth, Science and Technology, see our sites on the web: <http://www.soest.hawaii.edu/atmo/> and <http://www.soest.hawaii.edu/>. Qualified women and members of minority groups are encouraged to apply. The University of Hawai'i is an equal opportunity affirmative action employer.
